But rest assured, we are very much focused on getting the game out there in the fall! We're a little more than two months away from the official launch of Plants vs. Zombies 3, and it's time to share more details about what you can expect to see when the game launches, how to prepare for the game, and how to take advantage of the free trial version. We will be releasing more details in the coming months, and we're excited to share more with you. Our plan is to release more content throughout the year, from the initial release of the free game to launching the Season Pass. For now, here are a few things you can look forward to when the game launches this summer: Free to Play For those of you who haven't played a Plants vs. Zombies game before, we are taking a different approach with Plants vs. Zombies 3 that we hope will make the game more accessible to a wider audience. Instead of requiring players to pay a subscription fee to play, we are making the game free to play. We will be testing the game in a limited number of countries for now. We're hoping that some of you will be able to help us test in your region by participating in the limited testing period. We plan to roll out more information about testing in the near future. We'll be sharing more information about the limited testing period and how to participate in it in the near future. In the meantime, we'd love to hear your feedback and what you're looking forward to in the game. As we all know, the game industry has historically been extremely difficult for players who aren't huge corporate entities. The cost of bringing a new game to market has been prohibitive and the barrier to entry has been extremely high. As a result, many talented and innovative developers have had to seek alternative approaches to development and distribution, including independent publishing and self-publishing. We're excited about the opportunity to use the free trial version of Plants vs. Zombies 3 as a means to develop the game while at the same time providing a way for us to gather feedback about the game's design. As we playtest the free trial version, we'll share feedback with the community and use that information to help improve the game in the future. And if you want to see how the free trial will work in action, you can watch our new YouTube video
