Quick Shut Down

This review is from: Quick Shut Down 2.0 (2,944 downloads) Quick Shut Down is a fast and easy to use shutdown utility that enables you to shutdown, restart, logoff, standby, hibernate or lock your computer with just one mouse click. When QSD is running, an accurate miniature icon appears on the taskbar on the end opposite the "Start" button. You can choose to click or double click it with the left mouse button, and it shuts down or reboots your computer. You can set a keyboard shortcut for any action - shutdown, reboot, hibernate, standby, lock, logoff and media eject. Quick ShutDown allows you to set your own tray icon to be displayed. Click it with the right mouse button to view the context menu. Also, QSD can automatically terminate applications if they are not responding making shutdowns both quicker and safer. In addition, Quick ShutDown can eject removable media drives at shutdown preventing you from losing your disks and CDs by leaving them in the drive when you leave. It is possible to use Quick Shutdown from the command-line. Quick ShutDown optionally terminates programs that aren't responding, making shutdowns both quicker and safer. You can easily set hotkeys for each task (shutdown, reboot and logoff). The program meets a real need for millions of Windows users, consumes a minimum of resources, but offers a maximum of features. Here are some key features of "Quick Shut Down":
☑ Quickly shutdown, reboot, logoff, hibernate, standby, lock workstation and eject removable media by double-clicking or single-clicking on the program's icon in the desktray.
☑ Eject removable media at shutdown.
☑ Set hotkeys for shutdown, reboot, logoff, lock, hibernate, standby and media eject.
☑ Optionally terminate programs that are not responding.
☑ Run it on Windows 9x/Me/XP/2000/NT.
☑ Define your own tray icon to be displayed.
☑ Install and uninstall it automatically
Requirements: ☑ 8 Mb RAM ☑ 352 Kb hard-disk space
