☐ This is a multi-user application with a powerful set of features designed to assist the quality assurance professionals in their daily work. CleverTrack is designed to meet the needs of any QA team and is flexible enough to be used in many different ways. ☐ With CleverTrack you can: ☐ 1.

Check the quality of your project [?] 2. Create, manage, view and print test cases, bugs and user stories [?] 3. Assign a budget and plan the progress of the project [?] 4. Analyze and control all the project data [?] 5. Generate comprehensive reports on your project [?] 6. Connect the software development and quality assurance departments [?] 7. Coordinate all types of

test cases and analyse their results [?] 8. Easily migrate your project data to a new CleverTrack installation [?] 9. Export the project status to all major spreadsheet formats [?] 10. Integrate with popular bug tracking tools [?] 11. Perform automated testing [?] 12. Do any other things you might need to do when you are managing the quality of your software

projects By using
CleverTrack you will be
able to - plan and execute
all types of tests - control
all types of bugs and user
stories - effectively plan
your project - analyze and
control all the project data
- present all the project
information to team
members - easily manage
all project files - easily
compare different
projects and test results -
easily export project data

to other systems - control the status of your project, and any of its artefacts - quickly execute any tests and check their results - seamlessly integrate the development and QA departments - easily connect the QA team to the business and team members - easily analyze any type of reports generated by tests, bugs and incidents - easily track all the project

artefacts - easily and reliably schedule, track and control all the project activities - easily import project data from any other system - get detailed project reports - get all test reports - quickly create any kind of required reports - automatically process any incoming requests for changes - easily send and receive emails - perform automated testing -

perform any kind of analysis of any project artefact - perform any other functions you might need to perform * The international version of CleverTrack can be accessed using any major web browser in any language, the

CleverTrack [Win/Mac]

KEYMACRO is a strong password manager. It can

remember any number of login/password combinations, store them safely, and ensure that no duplicate entry occurs. The system will never forget. KEYMACRO is very easy to use. In fact, you don't need any training. After logging in, you can set up your own categories for storing passwords. If you wish, you can log in using a browser that support

cookies or any other login mechanism you might like to use. KEYMACRO is very portable. No installation is needed on the client computer. KEYMACRO is distributed as a single.EXE file. KEYMACRO can import your existing login/password database. This way, all the login/password combinations you are

accustomed to will not be lost. KEYMACRO is well integrated with Windows. It can work as a login password replacement if the password is expired. KEYMACRO can also be used for authentication. You can use it as a two-factor authentication system. KEYMACRO is integrated with the system. Once KEYMACRO is installed, a small application is

automatically created on the client computer. You can use this application to synchronize the databases. KEYMACRO is a full-featured password manager. It includes all the most important functions you need for securely storing and retrieving passwords. KEYMACRO is encrypted in the database. The encryption is based on a special algorithm

developed by ourselves. KEYMACRO supports Unicode. Its name is derived from the concept of a key. As you can see, it is written in ASCII, so it supports all the Latin languages. KEYMACRO can remember as many login/password combinations as you like. KEYMACRO includes a large number of security options. You can define how to encrypt your data,

whether to use a random salt, etc. KEYMACRO supports Unicode. Its name is derived from the concept of a key. As you can see, it is written in ASCII, so it supports all the Latin languages. ❓ CleverTrack is a web-based quality management system (QMS) for managing and controlling the quality of software projects. It is designed to help you reduce the number of defects in the software you deliver and therefore allow you to deliver software of higher quality and longer term, with less

risk. It was designed to operate across a range of technical industries, and particularly the software industries, but it should work equally well for any type of project where you need to manage quality and project risks, CleverTrack provides you with a number of features designed to support quality management processes, and to help you reduce the risk of defects

and errors in your projects. Acceptance test results and identify which are to be used in future projects Data search and reports Audit logs User and group permissions User-friendly web-based tool Integrated with other integrated systems Requires no installation - just access Provides end to end software testing solutions

Migration of requirements and use cases from other systems

- ☐ Easy integration with E-mail, excel, csv, text and pdf formats
- ☐ Supports multiple languages
- ☐ Web service API for external integration
- ☐ Automatic update - no downtime
- ☐ 30 day free trial for evaluation purposes
- ☐ All reports are generated in PDF format
- ☐ Easy to use integrated wizard to

generate test cases [?]

Ability to customize test scripts and forms [?]

Create custom forms for test cases [?]

Advanced filter and search tools [?]

Create custom filters that are easy to apply to a list of requirements, reports and test scripts [?]

Ability to attach documents, such as screenshots, to test cases [?]

Autopilot can generate test scripts from templates or customize

them using the
WYSIWYG HTML
editor [?] Autopilot
provides a two step
approach for executing
test cases [?] No need for
manual execution [?] All
standard templates and
formats are supported [?]
All reports are
customizable [?] Reports
can be exported to PDF [?]
Ability to import test case
documents directly from a
local file [?] Easily access

and update the data
through a well-organized
UI [?] Support for various
formats including XML
and CSV [?] Ability to
work on several versions

What's New In?

CleverTrack is a powerful
tool designed for
controlling the quality of
software projects and
improving the quality of
application development

in your company.

CleverTrack has all the necessary administrative functions associated with planning, control and evaluation of tests. By combining project analyses, testing and bug administration, it provides enhanced testing options to increase the quality of your software products. Due to the integration of all these segments into a single project, all your

requirements arising during the project analysis will be fully covered. The system consists of 5 basic areas:

- ☐ Administration of test cases
- ☐ Administration and planning of tests
- ☐ Testing and reporting of bugs
- ☐ Integration with Bug Trackers
- ☐ Evaluation of tests and generation of reports

What this means in practice is that

CleverTrack helps you control the entire process of quality assurance for the software under development, ranging from definitions of requirements and tests to planning and execution of tests. As a result, you will have a complete list of bugs identified in the software and all the useful statistics and QA reports containing complete data. CleverTrack is a utility

created for you to easily control the quality of your software projects. Here are some key features of "CleverTrack":

- Data import wizards for easy migration of existing data
- Full Unicode Extended Character Support
- Unlimited free upgrades and support
- Web Services SOAP API to enable integration with other tools/applications
- Universal availability

Software as a Service
application

International multilingual
on-line support (on-line
help in English, Deutsch
and Czech language Test
Case Management

Ability to attach
documents and other files
to test cases Ability to
define custom test case
properties, both free-text
and list-based Ability to
filter the list of test cases
by any of the built-in

properties [?] Ability to pause an incomplete test run and continue running it at a later date [?] Audit log of all changes made to test cases in the system [?] Complete trace ability from a recorded incident to the underlying requirement that was not satisfied [?] Create, edit and delete project test cases that are stored in a hierarchical folder structure [?] Data import

wizard that allows easy
