* Idea born: my friend and a colleague of mine wanted to get a few laughs, so I decided to develop this hacking utility. * The service itself is free but if you want to remove the ads, you can pay a dollar to get the software. * It's a Windows app, therefore, it will run on any Windows machine. * The main emulation activity is attributed to several menus, line and codes that are generated automatically. * It has many preset options, but you can also add your own set of commands and/or keyboard shortcuts to the main emulation activity. * Some more awesome features: - Mute text while typing! - Add a custom message to your text that will make it look nicer. (Note: this is not a spamming tool!) - Write down words online in a single click! - Write a random message in the chat! * Here is a bit of footage that shows how the emulator works: (1278x720) This app is a 'hack' in any case, for those who said 'I don't want to be a hacker, I don't want my kids to be hacking, etc etc', here's a bonus for you. The media is getting in on the act as they had earlier been suggesting that the government was intending to limit the number of minimum wage earners from 9 to 11 on April 1st this year, which was later blocked. The newspaper ads that were displayed on the front of the newspaper, being the Courier-Mail and the Daily Telegraph in Australia, suggested the a change from 9 to 11 was going to be put in place, which also didn't materialise. This is a very odd circumstance, as the Commonwealth of Australia is supposed to be a democratic government that functions on the consent of the people, yet the people still haven't made their final wishes known. Any way, do you agree with the decision or is it too radical for you? Let us know below in the comments section. "We've long said that keeping wages growth at the 09e8f5149f

JunkJack Games: Batman Simulator brings you a full Batman Simulator experience you won't find anywhere else! Batman Simulator is a first person 3D Batman simulator that brings you the feel of walking in the shoes of Batman by exploring Gotham City, exploring the Bat Caves and either over shooting or a tumbling down. It's the best full Batman Simulator experience you will be able to get. The game consists of 4 chapters which can be played in any order you want. You will choose a chapter, play through the game and at the end will receive a highscore. In total this game has 4 different levels. Use the right amount of shades from the given colors and control Batman from a first person view. Use gadgets from the Bat Caves to either shoot your target or tackle Batman. There are 3 different Bat Caves which are unlocked depending on the chapter you select. The level design is quite good. The story is told on the Bat Caves by a narrator. In the story different locations are used to tell the story. Each location has different tints which can be used to change the color of the environment. The game also features a level editor and challenge modes so you can make your own levels and challenges. I've been unable to actually give it a fair chance, due to numerous glitches which forced me to stop playing. While I liked certain elements of the game, there were also numerous glitches which made the game almost unplayable for me. Some of the glitch actually stopped my progress. I'll give it an average 9/10 for the story, but it's best not to ever play this game unless you can get past the glitches.
