What's New in the?

The main window has two parts. The top part is the slideshow, which is where you choose the images you want to see. The bottom part displays the thumbnails of the images you selected. Features: * Customizable slideshow with mountain images and Mountaintop profile photos.* Preset options: pre-defined slide shows or at your leisure.* You can have one or more slideshows on your desktop at the same time.* Organize your slideshows as you like.* Easy to use.* Easy to configure.* Easy to share* Quick to learn.* Quick to use.* No hidden and/or other code to install.* No setup required.* No technical know-how required.* No internet access required.* No JavaScript or other browser plugin required. Mountain Photo Tutorial: * Set the slideshow settings (adjust the number of slides you want to display, the display duration and the interval between slides.) 1. From the main window, click on the right arrow button to go to the settings page. 2. On the settings page, choose the slide shows you want to use and enter the details: number of slides you want to display, display duration, and the interval between slides. 3. Click Save to apply your settings. 4. Close the settings page and go to the main window. The slideshow on the main window will now begin automatically. You can pause and resume the slideshow or stop it anytime. 5. On the main window, click on the left arrow button to go to the pictures page. 6. Here, you can select pictures you want to see from your file system or from online photo album (for example Flickr, Facebook or Picasa). 7. You can also select other photos you want to use as a backdrop or insert on the main window by clicking on the picture album icon in the toolbar. 8. To select pictures from an album, click on the image album icon in the toolbar, then click on the album name in the dialog box. 9. To select pictures from your file system, open your Windows Explorer and select the folder where you want to select the images. Click on File to open the Select File dialog box. 10. Then select the photos you want to use. 11. Close the pictures page and go to the main window. You can resize the images as you like. 12. If you don't like the pictures you have selected on the main window, click on the zoom icon in the toolbar. 13. The zoom window will open. 14. You can now pan the zoom window around the pictures you selected on the main window. 15. Click the scroll icon in the toolbar to zoom out or in to get a better view of the pictures you have selected. 16. To set the order of the pictures
