Tags On TIFF Converter Tagged Image File Format (TIFF) is a de facto industry standard among graphic designers and photographers. It is the ultimate solution for archiving, storing, processing and sharing of your digital images on digital media devices. Tagged Image File Format (TIFF) is also the world's most commonly used image file format. TIFF is not only a powerful tagging format, it can also store complex information about your photos. You can store not only RGB values, but also meta-data such as title, file name, date of creation, copyright information and creation date. Tags On TIFF Converter gives you the opportunity to organize, rename, resize, crop, tag, composite, rotate and add watermarks to your TIFF files.

Thanks to its label control, TIFF files can be directly uploaded to social media and online communities.
