out code that you don't need? Type something in the search box and it will show you only what matches that specific text. 4. 'Kinda' like the code highlight of VS2012, able to specify what text should be bold, underline or italic. This in conjunction with the symbol browsing functionality, is very useful when you have to decide which parts of the code you would want to have the highlighting applied to. 5. Good 'one-stop' solution for all coders. For the developer in me, it's like having a c++, js, perl, java and html IDE all rolled into a single application. I bought the mac version (paid around 45 pounds) and I found it absolutely useless. My complaint from a few other customers was that the software didn't show you the source code, it only shows the files as separate text files that you can save and open. So you can't link to file structures in your project for eg. Please see our review on Windows version: 09e8f5149f

Thanks Nice thing about this program is you can open a code file without the need to install any additional application as well as the fact that it's freeware... If you are in a hurry to read through a code file or a collection of code files, then Source Insight has probably the most convenient and intuitive user interface. It's also handy in what regards multi-line search and replace operations. The program can open a text file for editing but most of the time it's going to be a binary, e.g. a.exe file. Some of the formats supported by Source Insight include JavaScript, C, C++, C#, Java, Perl, Python,... While opening any text file for editing, the user can specify a search expression, an exact match or a regular expression and a property of the search terms in order to filter the results. Source Insight supports the most common text editors of the current period, but if an editor you prefer is not included in the menu, just ask for it by sending an e-mail or posting to one of the Source Insight support forums and expect to receive an answer within a few hours or few days. The property of a search term allows to look at its

selection (selection contains all the specified characters), case sensitivity or any other attribute. Therefore, it
