For over 30 years, AutoCAD has evolved and expanded to become an application with a long life cycle. The current version of AutoCAD, AutoCAD 2020, was released in February 2020. The mobile app is available for Android, iOS, and Windows smartphones and tablets. AutoCAD 2020 adds new features to the existing software to improve the user experience and add to the workflow capabilities. AutoCAD 2020 adds the new 3D Drafting and Modeling (3DDM) toolset. 3DDM represents a major upgrade in the AutoCAD user interface that delivers a totally new user experience. While the basic features of AutoCAD will be familiar, the new user interface provides for easier navigation and better readability. The workflow and design creation features of AutoCAD remain the same, and are familiar to users of previous AutoCAD versions. The new user interface will also allow for a more enjoyable and productive work flow. AutoCAD 2020 offers 2D BIM models in architectural and mechanical design. While AutoCAD previously provided limited 2D BIM modeling tools for architectural design, the new version of AutoCAD now allows for the creation of 2D BIM models from 3D solids and surfaces. AutoCAD 2020 is the first version of AutoCAD to include the Linking feature that was introduced with AutoCAD 2017. Linking allows for the insertion of CAD and CAM components into BIM models.
