- Rotates 90 degree
- Has two layout view that will help you separate the keyboard characters from the special symbols.
- You can switch between these screens using above said buttons.
- Default font is JScript Time New Roman. You can use any font from a list of fonts by clicking the chosen font on the list or type the character directly in the keyboard layout.
- Keyboard

layout is designed for the region you are in. If the keyboard layout is not correct or not designed for your region, you can change the layout in the program. • Can be used for learn to type regional language fonts. To use English keyboard layout for English font type the glyph, and if the glyph is not part of English keyboard layout, click on the alternative glyph button and select English keyboard layout. • Click on desired character button, that will

reflect on the editor window.

After typing is over press COPY button to copy the characters in edit window to the Windows clipboard. This can be pasted to any software that accepts Windows Clipboard.

- Type the matter with FontMatrix and Copy it to your editor.
- The **KEYBOARD LAYOUT** is intended for learn to type regional language fonts. First, change the font from the font list and change font size that characters to best fit

inside the buttons. • Click on desired character button, that will reflect on the editor window.

After typing is over press COPY button to copy the characters in edit window to the Windows clipboard. This can be pasted to any software that accepts

Windows Clipboard. • Can be used for learn to type regional language fonts. To use English keyboard layout for English font type the glyph, and if the glyph is not part of English keyboard

layout, click on the alternative glyph button and select English keyboard layout. • Typing with Italian Keyboard layout. • You can use any font from a list of fonts by clicking the chosen font on the list or type the character directly in the keyboard layout. • Keyboard layout is designed for the region you are in. If the keyboard layout is not correct or not designed for your region, you can change the layout in the program. • Switch between the

two layout view by pressing the SWITCH button. • FontMatrix Description: • Can be used for learn to type regional language fonts. To use English keyboard layout for English font type the glyph, and if the glyph is not part of English keyboard layout, click on the alternative glyph button and select English keyboard layout.

What's New in the FontMatrix?

* FontMatrix provides two

independent Layouts. In the first Layout (KEYBOARD LAYOUT) you can type large characters like English lettering. Select characters from the ALL CAPS LAYOUT and move it to the Keyboard Layout. * SIZE and adjust the font size * Use the keyboard keys to scroll through characters in the keyboard layout. * COPY keyboard characters to the Windows Clipboard * PASTE keyboard characters to any software that accepts Windows

Clipboard * For the purpose of learning typing, make this window's size bigger than the keyboard window PocoFakt är en digitalfotmat skrivprogram, som det enkelt och snyggt kommer att hjälpa dig att skriva alla dina nummer, kod, Prenumerera och så vidare. Set it up in about 5 minutes! Instalation of PocoFakt will not include a program, because it is just the fonts. No one says that you cannot have them installed but it would be a

big mystery how to install them. The whole installation is done using FontMatrix. It has a console where you can enter commands without the program popping up. That is where you see the FontMatrix menu and choose the PocoFakt Setup. The first time you run PocoFakt, enter the setup menu and you will be prompted to choose the language from the font list. PocoFakt Features: *
Type digits with full unicode *
Read/Write Unicode * Backspace

* Paste to file (does a bit weird but it works) * Copy to clipboard * Print * Setup Program * Self-Extract * Auto Install * Features highlight * Autocorrect * Highlighting of errors * Word completion * RTF files can be modified * Clearing clipboard * Undo (Word Completion) * History (Software Installations) * Jump to Word Completion: Shift + Alt + Space * Jump to Clipboard: Shift + Ctrl + Space * Text Color Style * Auto Number:

Tab + Space * Paragraph * Bold
Text * Italic Text * Underline *
Font Color * Font Size *
Columns/Rows * Bullet List *
Bullets * Highlights * Quick Add
