Q: How to concat a string in asp.net core? I am trying to concat a string in asp.net core with c#. The string contains a comma separated list of user names. string format = "this, that, the other"; string[] users = format.Split(','); if (users!= null && users.Length > 0) { List list = new List(); foreach (string s in users) { list.Add(s); } return list; } Is there a more elegant way to do this? A: I would suggest using string.Join: string format = "this, that, the other"; string[] users = format.Split(','); if (users!= null && users.Length > 0) { return String.Join(", ", users); } A: Use.Trim() string format = "this, that, the other"; string[] users = format.Split(',').Trim().ToArray(); Q: How do you setup a virtualhost in NGINX that uses a non-default port? I am running NGINX as a reverse proxy in front of several Rails apps. The apps are running on the following ports: 80 (http) 81 (https) 82 (websockets) I would like to create a virtual host for my app that uses port 81 instead of 80, and I would like to use this virtual host only for HTTPS traffic. I have tried this configuration: server { listen 4bc0debe42
