Scanned Document Distributor is an application designed for professional document scanning and distribution. Scanned Document Distributor lets you configure several scanning options, and then perform any number of tasks on the scanned documents. The Scanned Document Distributor allows you to split and scan single-sided documents into separate documents, or into two or three pages per document. You can also move any or all of the pages in a single document, and also perform many other functions on the scanned documents. Scanned Document Distributor is designed to meet the needs of companies that scan large numbers of documents into the database. The application makes it easy to process thousands of documents in a few seconds. Scanned Document Distributor is designed to meet the needs of companies that scan large numbers of documents into the database. The application makes it easy to process thousands of documents in a few seconds. Why Use Scanned Document Distributor? Scanned Document Distributor is designed to be used by professionals. It has been developed to ensure that the documents scanned by the application are in a form that is suitable for use in a database. Scanned Document Distributor is the ideal scanning tool for companies that need to add document information to a database or to a cross-referenced index. Scanned Document Distributor lets you configure your scanning options and perform any number of other tasks on the scanned documents. Scanned Document Distributor has a choice of three scan actions: PDF is a lightweight file format that is frequently used for electronic documents. PDF is easy to work with and to read, and you can move the pages of a PDF document around to create new pages or make them change size and orientation. Scanned Document Distributor includes a simple, free PDF converter. This converter lets you convert a PDF document into a document in the Scanned Document Distributor. Scanned Document Distributor will then scan the document and place the pages in a document in the database. Scanned Document Distributor lets you combine the scanned documents into a single document. The document can be sent to a database, and you can perform any number of functions on each page of the document. Scanned Document Distributor is designed to meet the needs of companies that want to store large numbers of documents in the database. Scanned Document Distributor lets you create a directory that includes the names of the documents and information about the documents. Scanned Document Distributor uses compressed documents. This reduces the amount of space that the documents

The program allows you to quickly apply special effects to your pictures, without the need of advanced knowledge.
