## MusicBox.NET

>> Playlist/music collection/albums/audiobooks >> Search for music > Search for audiobooks > Playlist editor > Add music/audiobooks to a playlist > Play music/audiobooks > Edit playlist > Play from currently playing audio source > Play next > Previous > Next > Previous chapter > Next chapter > Play/pause > Pause > Stop > Repeat > Skip to Next > Skip to previous > Random > Channels > Adjust volume > Mute > Fade > Fast Forward > Fast Backward > Rewind > Volume normalization > Set as Ringtone > Set as notification sound > Forward Speed > Backward Speed > Loop > Search for media > Show songs that are currently playing > Add music to favorites > Search from favorites > Download music from the Internet > Burn music to CD > Record audiobooks to MP3 > Backup music to FLAC/WAV > Burn audiobooks to MP3 > (in progress) Support for chiptunes > (in progress) Support for loops > (in progress) Support for audiobooks > (in progress) Support for Replay Gain > (in progress) Support for FLAC > More to come soon >> >Q: Why can't an offer ask the asker to indicate they don't want to answer the question I've just seen a new-ish account answer a question with a nearly incomprehensible "nothing written" comment. I suppose in this case "nothing written" was effectively his answer. But what's so special about the one line question that would preclude him giving an answer? "Nothing written" is a legitimate answer to the question. But there was a choice - "nothing written" or "nothing written, but no point writing any more", ie just don't answer. This is the type of question I always find myself on the wrong end of - "can I ask a question?" - "You can ask a question if you can add something useful to the site." On Stack Overflow, moderators usually clarify these requests, but what happens in cases like this, where the asker just says "I have a question" and doesn't really want to answer, but the mods simply say "you can't ask a question and

## What's New In MusicBox.NET?

MusicBox.NET is a lightweight, advanced music player for Windows, supporting all audio formats and partial support for chiptunes. It is designed for beginners, professionals, and hobbyists, as well as for casual, friendly, and fun music playing. It's made of C#/.NET 2.0 / 3.0/3.5/4.0, and is freeware. MusicBox.NET is ideal for listening to music, watching movies, playing games, and sharing it all on the web with Twitter or Facebook. To use the program, first download the MusicBox.NET downloader from the Downloads page and run it.

1. Playlist You may add music files or other playlists to the list.
2. Main Window In the main window, you can see the song list, artist list, and album list. You can also sort the files, and choose play mode (play/pause/stop).
3. Play Mode You can choose play mode (play/pause/stop) to play the files in the song list.
4. Play List The song list is by default displayed in alphabetical order. You can change the order of the list by choosing a sorting option (ascending/descending). You can also mark the songs in the playlist as favorites.
5. Favorite You can mark the songs in the song list as favorites.
6. Album You can mark the albums in the album list as favorites.
7. Songs You can view the files or folders in the list and manage the files.
8. Artist You can mark the artists in the artist list as favorites.
9. All You can use this option to see all files.
10. Properties In the Properties window, you can change the folder, the playback options, the file size, the artist name, the album name, and more.

Compatibility and Requirements: To run MusicBox.NET, you need: .NET Framework 2.0 or higher Windows XP (SP2), Vista (SP2), or Windows 7 .NET Compact Framework Community Support MusicBox.NET includes a built-in FAQ with detailed answers to all your questions, and you can get help in the support forum: Additional support If you have questions about the program, please post them in our support forum: File-sharing sites such as Rapidshare do not like to show specific references to external programs. Even though the program is no longer available, you can still download the.NET DLLs for the program by clicking here. MusicBox.NET is licensed under the GNU General Public License (GPL) version

---
