XP Web Buttons Crack+ Free Download

XP Web Buttons is a tool that allows you to create superior XP-style web buttons and menus in just a few clicks. XP Web Buttons enables you to produce stunning looking buttons and navigation bars for your web pages with ease. XP Web Buttons generates all button images, Javascript and HTML code on the fly, so you don't need any additional graphics or programming skills, and you'll get instant results. The buttons are fully customizable, they react to mouseover and mousedown events, support any XP themes, font face, font style, shadows, icons, alignment, links, targets, tooltips and more. Once XP Web Buttons is installed you'll be making buttons for your web site quickly and easily: no programming or drawing skills required. XP Web Buttons can create complete web menus as well as single images of buttons. These menus can be either horizontal or vertical and support "rollover" and "click" effects with a full set of Javascript and HTML code. Web menus created by XP Web Buttons exactly correspond with Windows graphic interface components. That is why visitors to your site will not have to spend time familiarizing themselves with an unusual navigation scheme. Nevertheless, you are not limited by the standard Windows themes, so you can create your own original buttons as desired. Each change of button-menu appearance is instantly displayed in the Preview Window. At the same time, you will be able to test how the buttons would respond to mouse events. Here are some key features of "XP Web Buttons": ⏣ Easy, quick, professional Its very easy to create professional high-quality web buttons with the help of XP Web Buttons. Once installed you'll be making buttons for your web site with no programming or drawing required. ⏣ Total control of all menu parameters Each parameter of a button may be easily changed, allowing you to achieve the required result. You can set such parameters as direction, size, color, font face, font style, shadow, icons, alignment, links, targets, tooltips, word wrap, and other parameters. Any change can be undone by pressing "Undo" button. ⏣ Not just buttons XP Web Buttons is able to create not just separate images of buttons, but also complete web menus. These menus can be either horizontal or vertical, they support "rollover" and "click" effects with full set of javascript and html code. ⏣ XP-style menus Web menus
