The new Metro Tunnel, currently in its planning stages, will run through Carlton and the CBD before linking up with the existing Eastern Suburbs rail line and Monash University. It will replace the existing north-south road link that runs between the city centre and the Monash University campus. The Metro Tunnel alignment will run between the existing Southern Cross station and the proposed new University of Melbourne station. (Supplied: Skilled Transport) However the Department of Infrastructure has already begun design work at the location of the new university station, which is due to open in 2028. The project's director of engineering and project manager, David Fitch, told the ABC the department wanted to provide early design and civil works to the site before construction began. He said the work at the site was limited to "scoping activities". "The long-term vision is we'd like to get that design, of what the railway will look like, complete before we actually start constructing the site, so that we have more of an idea of what might happen," he said. "We don't want it to change the way the railway works or anything like that, we just want to make sure that we're designing things for our purpose."
