

However, for simplicity, we aim to send you one unlock code. Depending on your model, the code you receive will be either 8 digits or 16 digits ... Some devices only have 8 or 16 digits, others 18 or 24 digits, while some may have more digits or no digits at all. If you have not received a code for your device, please contact us and we will email you the code. Most models use a 4-digit combination for locking, for example 844444. This means that you press buttons 1 and 4, and then 1 and 4.
