## **PDFCompressor-FM Crack + [Updated-2022]**

PDFCompressor-FM is a small application that can help you with your PDF file processing. It will optimize PDF files of various sizes with all sort of tools (page compression, encoding, compression, watermarking, etc.). It will also allow you to merge PDF files into one single file. You can choose the resources used for these processes and specify the parameters. PDFCompressor-FM allows you to avoid creating a new file, it uses a simple drag and drop mechanism and the applications' interface is easy and intuitive. PDFCompressor is a utility designed to help you resize large PDF files many times over. It is optimised to compress PDF documents and images and the developers claim a compression rate of up to 91% while maintaining the highest quality. The app also includes a folder monitoring feature that processes all new files and removes unused pages, invalid links, bookmarks and optionally, watermarks. Comes with a user-friendly interface and you can get started by creating a new job using the small plus button located right under the main menu. To create a new job, you need to provide a name, select a profile, specify the input, output and error folders, choose a compression tool and specify the parameters. In case you want to keep the original file as well, then it is important to specify an archive folder, as the app is configured to delete it by default. The highlight of the app stems from the fact that you can monitor the input folder and hence, the app proceeds to compress all new files added. Therefore, you configure the job once and the app does all the boring tasks for you. A reliable tool for compressing PDF documents automatically As previously mentioned, the tool can also optimize the documents and you can check out the dozens of features in this sense from the Profile's settings. While PDFCompressor-FM is mainly designed for PDF files, you should know that it works equally well with images for which you can perform both optimization of image depth color and compression. PDFCompressor FM is a small application designed to help you resize large PDF files many times over. You can choose the resources used for these processes and specify the parameters. PDFCompressor-FM allows you to avoid creating a new file, it uses a simple drag and drop mechanism and the applications' interface is easy and intuitive.
