GRANNY FIXUP FILE SECTION 12 135

GRANNY FIXUP FILE SECTION 12 135 (UPD) . The ZINDOGO DELHI SCHOOL is in the region of Central ZINDOGO DELHI is a Delhi School (also known as the Delhi Board) in Delhi, India. It was formed in 1922 as the Sanskrit School and was named Delhi Sanskrit School until 1930 when it was renamed the Delhi Sanskrit School. . Format of the file: Each observation has four fields separated by ';': a. id, description, parameter (one row per group, which is a seven digits integer id) b. value (the observed value) c. units (as of 2/23/18) d. parameter (a seven digits integer id, which is associated with a free variable. ## Implementation details (subset of here :) The algorithm I implemented in python is the following: 1. Read all parameters in the file (there are n=number of parameters) 2. Sort them by id(the parameter id is not unique in the file) 3. Denormalize the observations(update the units in observation) 4. Loop through all parameters, for each parameter: a. retrieve the observed values (assume there is one) b. if there is another observation using that parameter, if not: c. update the units of observation d. update the values of the observed using the current observed value and the units in observation e. if there are observations using that parameter, sort them f. if there are still multiple observations using that parameter, merge them using the sorted id(rank them and group them by id) As you can imagine, this is a very slow and very basic method to do this. In the future, I'm going to use R/R Shiny to fix this issue. Paloechamps Paloechamps is a commune in the Seine-Maritime department in the Normandy region in northern France.
