Unforgettable sexual experiences and outstanding sex fantasies!Q: Selecting only data from database where something has changed I have a form for adding items to a database. On a page I have a button that is used to change the status of the item. I would like to do a query only on the items that have been modified since the last time I ran my query. I was thinking something along the lines of: var items = from item in db.Items where (DateTime.Now.Ticks - item.Timestamp) > 0 select item; item.Status !=item.Status; db.SaveChanges(); item = from e24f408de9
