## VIC OnCall Firewall With Serial Key Free [Win/Mac]

VIC OnCall Firewall is a security software that blocks and prevents unauthorized access to your computer and prevents unauthorized access to your private data. On-call Firewall Application Detection: VIC OnCall Firewall has a built in application detection system that checks for all new application connections. It prevents application installations and configuration changes that will cause your security to be circumvented. The firewall does not only prevent access to other applications, but to the internet as well. It is a security tool to protect your private data and computer against Internet-Attacks, Trojans, Malware, Spyware, and other Online Attacks. On-Call Firewall - Exploit Protection: VIC OnCall Firewall features a unique exploit protection system that blocks known and unknown application exploits (viruses, Trojan horses, hacking attempts and other unauthorized code injections) before they reach your computer. If your computer is connected to the internet, On-Call Firewall detects them and blocks any application installation attempts that have the same known virus signatures and that originate from the same location. Protects Your Applications: VIC OnCall Firewall prevents applications from loading, stops malicious software, as well as protects your installed applications from attack and removal. Detailed Firewall Information: At VIC OnCall Firewall you can view detailed information about your firewall status, log-files, account information and can even view your firewall log for individual connections or for selected IP addresses. Preventing From Internet-Attacks: VIC OnCall Firewall prevents access to websites, other computers, online services or shares, and to even the Internet itself. If you use the internet with your computer, VIC OnCall Firewall is a must have tool for security. VIC OnCall Firewall - Parental Control: VIC OnCall Firewall includes a parental control system that allows you to regulate internet use, limit internet speed, and more. You can also select applications or IP addresses to block. VIC OnCall Firewall also includes an alarm system that will notify you in the event of suspicious activity or abuse. Simple Installation and Operation: VIC OnCall Firewall installs automatically without having to be configured by you. You can install the parental control, alarm and web filter feature with just a few mouse clicks, which makes for a quick and easy setup. VIC OnCall Firewall requires Windows XP SP2 or above, and you should have a minimum of 2GB free hard-drive space. The

### What's New In?
