KeyMacro is a tool that allows you to add macros to different types of files, such as text files, Word documents, images, and sound. It is a handy tool, which you can use to organize the contents of any file, given that you need a file. It is not advisable to use for adding content. KeyMacro runs as a standalone application in the system tray area. It's easy to see on your desktop or in your system tray area. It is very useful for people who always get text files with a lot of macros added to them. It can be used for adding macros to many files, without having to open every single file. This tool is ideal for people who are on the go and do not have the time to look for a Macro to add to a file. Macros can be easily added to multiple files without having to open each file one by one. Macros can be added to multiple files in one go. Macros are added to specific files, and are deleted when you delete the file. The file is not affected, or deleted. A special feature of KeyMacro is that it is also possible to add macros to multiple files in the same folder. The type of file in which macros are added to is not the only way in which it is decided to apply the macros. The application also decides the type of file on which the macro will be added. This is a feature of the application. KeyMacro is quite easy to use. It is used by people who want to add macros to the files. It does not make much sense to use KeyMacro for adding text to files, because it does not make sense to do so. It is always better to do this manually. What Is New in KeyMacro Version 1.0.4.0: Added ability to delete macros. Added ability to delete macros from multiple files. Added a splash screen. Added ability to add macros to specific files.
