FlasKMPEG is a program that enables you to convert video files (IFO, VOB, MPG) to several formats, including AVI. It can be used by both novices and experienced individuals. This is a portable tool, so installing FlasKMPEG is not necessary. It means that you can place the app on a removable drive, store it on any computer and directly run its executable file. More importantly, no changes are made to the Windows registry and no leftovers can be found after program removal. The interface of FlasKMPEG is pretty standard. Items can be imported via the file browser or "drag and drop" function. Unfortunately, you cannot process multiple videos at the same time. So, you can preview clips in a built-in media player and trim them by marking the start and end position, as well as crop videos and adjust the brightness level. But you can also configure audio and video settings when it comes to the letterbox, deinterlacing, aspect ratio, resize mode, codecs, frame size and frames per second. Plus, you can specify the thread priority, set FlasKMPEG to overwrite existing files, and to open the output directory or to turn off the computer after conversion. The video encoding tool supports multiple languages for the interface, has a good response time and takes a reasonable amount of time to complete a task. It delivers a good image and sound quality. Unfortunately, there is no help file available and the interface needs a complete makeover. But we must keep in mind the fact that FlasKMPEG has not received any updates for a very long time. ...
