SVN works nicely with svn.exe in a Windows environment. For some reason, it doesn't work with svn, at least not in Cygwin. I am thinking to set up a complete Git + SVN environment, so there is no need to have the svn.exe installed by the users. Is it possible to set up a pure bash svn environment (with subversion-bash or similar)? Is it possible to set up a pure Git environment which has a "svn-like" command? A: If you have the git svn info command, you can use it to download an svn-like file. The --no-minimize-url option will make git-svn download the actual svn project/repo data and not just the whole concept of a svn repo (such as a.git directory). The sonographic appearances of atrioventricular septal defects during cardiac cycle. To describe the sonographic appearances of the ventricular septal defect (VSD) and the atrioventricular (AV) valves during cardiac cycle in patients with pulmonary atresia and VSD, and to compare them to age-matched controls with intact ventricular septum (IVS). The VSDs were classified as perimembranous or infundibular, based on the septal attachments of the aortic root and the VSD. The presence of tricuspid regurgitation and the severity of the VSD were evaluated in systole and diastole. Twenty-one patients with pulmonary atresia and VSD (perimembranous n = 10, infundibular n = 11) and 23 controls with IVS were evaluated. The cavities of the VSD had distension during systole in 21 of 21 patients with pulmonary atresia and VSD and in 19 of 23 controls with IV
