FIFA is the world’s leading videogame franchise, with the FIFA series selling more than 375 million units to date. It was originally a series of association football videogames released by EA on the SNES, PlayStation and Sega Genesis. Since then, the franchise has appeared on PlayStation 2, PlayStation 3, Xbox, Xbox 360, PC, Wii, PS Vita, 3DS and Wii U. Like all FIFA games, FIFA 22 is available on Xbox One and PlayStation 4. FIFA 20, is easily one of the most successful iterations of the series. It was released in September of last year on Xbox One, PlayStation 4 and PC/Mac. In FIFA, you can control a range of live footballers and manage your very own team through the Career Mode. Take on leagues from across the world from the club level up to the international level. From a realistic representation of the real-world national team kits, to accurate animations, fully detailed player controls and exclusive features, FIFA delivers the authentic football experience. New Features 1. Defect Inspired by the FA Cup. With Defect, manage and control players who have chosen to leave your side on the transfer market. Some players become fans of your team and will cheer you on, but others will play to win! Defect lets you sacrifice one of your players to suit the needs of the game. Players will do the dirty work for you and will become your squad’s leading goalscorers and defenders and your team can still win through their aggression and determination. This feature is introduced by the EA SPORTS™ FIFA 18 Ultimate Team™ card that you collect. 2. Player Passes New touch-based dribbling and free-kicks. Simply tap on the back of your passing player and they’ll run into a pass lane and turn in that direction to receive the ball. Tap on the ball to free-kick and you’ll get a new free-kick angle which players can run into. A player can use this new free-kick to get back in the game if they miss or foul the ball, and don’t forget, when a defending player dives or trips, you can headbutt them to get the ball back. 3. Added Attacking System Improved movement of players and ball, attacking system, dribbling and tackling animations, ball physics and more. New animation system makes ball and player movement more realistic and makes bc9d6d6daa
