The familiar address book and email client for MS Exchange has just received a major makeover with the release of Outlook 2010 and Exchange 2010 from Microsoft. Gone are the old menus and confusing buttons found in previous versions. Now users can navigate the interface with ease. With a totally redesigned interface, Outlook 2010 is the most powerful email client for organizing and communicating with contacts and managing all your email messages. From a dedicated messages pane that's the centerpiece of the new design, to an improved search feature, to a new capability to quickly navigate to a contact or appointment when composing

email, Outlook 2010 has features that let you find what you're looking for and organize your life. Outlook 2010's new colors and modern, expressive icons make it easier than ever to find your messages, to read them, and to respond and schedule your tasks. Plus, there's a great deal of new functionality in Outlook 2010. With a set of new features, such as the ability to organize your inbox by conversation, and to view your email messages in a folder view that lets you quickly jump to any contact, you can have more of what you want -- more contact, more appointments, more organized messages -- without getting more email in your inbox. Microsoft has introduced a number of key new features in Outlook 2010.

- "New Inbox" - The new Inbox is the central organizing and productivity hub for email, meetings, and calendars, and it displays messages, contacts, and calendar items in the order they occur.
- Folder View - This view

displays all your messages from your mailboxes in a single view, leaving no confusion about who sent them, when they arrived, and what task they need to perform.

- Conversation View - This new view works in the same way as the New Inbox, but shows you a conversation thread for all your messages, including replies, forwards, and deleted items.
- Quick Reply - This new feature lets you respond to all the messages you send automatically with a single click, eliminating the need to copy and paste
