What is Adobe Photoshop? Adobe Photoshop is a professional photo editing and manipulation program for raster graphics developed by the San Jose, CA based company Adobe. What is Photoshop? Adobe Photoshop is a raster graphics editing program for PC developed by Adobe. The first version of Adobe Photoshop was released in 1987 and came to be known as the "missing link" in the creation of raster images. Prior to the creation of Photoshop, raster images were created by a process called rasterizing or by using drawing applications called vector graphics editors. Vector graphics editors are used to create images such as illustrations, logos and other repetitive graphics that lack depth and emphasis. Vector graphics editors use mathematical formulas to create pixels and other layers. With rasterizing, the pixels and layers are added to a raster image. Adobe Photoshop is designed to make editing easier and more easily understood, and to enable it to compete with other professional photo editing programs.

While Adobe Photoshop is primarily used for editing photographs, it can also be used to work on other types of images, especially in the creation of graphics. What is the difference between Illustrator and Photoshop? Photoshop (or Photoshop Extended) includes all the features of Illustrator, but also many more advanced features. Adobe's Photoshop is currently the gold standard for digital image editing, with a history that stretches back over 25 years.

The newest version, Photoshop CS6, brings a number of improvements and functions to the table. Photoshop provides an easy interface for editing images of almost any size. It is extremely well suited to professional photographers, graphic designers, and web designers. It is unique in the commercial world in that it is available as a closed-source desktop program, as opposed to a free, web-based platform. Adobe Photoshop is available in many different editions that are designed to serve particular markets. The "Creative" and "Standard" editions are available for a license fee. There is also an "Express" version which is free, but is limited to a specific number of features.

There is also an "Ultimate" version which is available for free to allow users to learn how to edit images. What is Photoshop CS6? The latest version of Photoshop, Photoshop CS6, includes a number of improvements and new features. Supports the GPU (Graphics Processing Unit) GPU support in Photoshop significantly increases the speed with which Photoshop

Q: PHP/MySQL(advanced) How to Use other User's Information From Table in Same Database? I am using MySQL database and PHP. My table is as below: Table-> Users Roles I want to add column 'Phone' in Users with following rules: If user's 'Role' is 'Admin' and 'Phone' field is empty, then 'Phone' field should be populated with '1234' number If user's 'Role' is 'Admin' and 'Phone' field has value, then 'Phone' field should be left alone. But if user's 'Role' is not 'Admin' and 'Phone' field is empty, then 'Phone' field should be populated with user's 'Role' information. If user's 'Role' is not 'Admin' and 'Phone' field has value, then 'Phone' field should be left alone. Can any one help me how to write this query to achieve my goal. My real life problem is: I have two users(Admin and User). User can see all the details of Admin (user name, group name, phone etc..) Admin can see the details of user for which she has permission(User) Admin can see all the details of every Admin for which he has permission(Admin) Admin can see the details of every user for which she has permission(Admin). Can I achieve this using just one table? And if so how? I don't want to implement it using joins. So I used 2 table to achieve it: Users(User), Roles(Admin,User) A: Try UPDATE Users SET phone = ( SELECT Phone FROM Users WHERE Role = 'Admin' AND (Phone IS NULL OR phone = "") ) WHERE Role 'Admin' Q: Twitter Bootstrap Tooltip Data-popup-pointer adding unwanted div I am trying to add twitter bootstrap tooltips to a news site. The tooltips work ok, but the problem is that data-popup-pointer div is added to each tooltip, as well as some other extra divs. The divs are generated by the
