A: This is a stripped-down version of your first string. It is the number of lines between each chunk of text. ^.{4}(?.*?){4} Demo: The first capturing group will give you the numbers between 2 and 3. preg_match_all("/^.{4}(.*?){4}/", $text, $matches); Demo: Was just in the UK and picked up some 2000's copies of Hyperdub's debut album from 'The Dome' in Manchester a few weeks back. Both in stock and available to purchase! Hope it does well. Not their best album by any means, but certainly an interesting listen if you are into that sort of thing. The origin of the modern world of air conditioning Toothpaste started in 1909, but it would take another decade before air conditioning was invented. While AC was made possible through chemistry and chemistry alone, it was also the result of two compelling motives: a rapidly growing population in the increasingly crowded cities of the US and Europe and the discovery of a new source of cheap energy. Batten down the hatches One of the first things that changed in the second half of the 19th century was the advent of air conditioning. It's no coincidence that it was invented around the same time that the first refrigeration machine was invented. In 1881, the French inventor Gabriel Voisin invented a model for an electrical refrigerating machine based on a closed system of pipes and air. Later, two German engineers – Carl von Linde and Johannes Raumer – realised that it would be possible to let the air into a refrigerating pipe through fans and heat exchangers. These enthusiasts thus invented the world's first "industrial air conditioner" in 1895, which took the form of a horizontally revolving fan that blew cold air through a series of pipes. It was basically a huge metal box 648931e174
