Rafto "Ice Age: Collision Course" (2016) - IMDb. A cine-comedic adventure about Sid and Manny after they are. Ice Age 4: Continental Cr.Q: How to pass data from one Activity to another Activity I've used an Intent to pass data from one activity to another. Intent data = new Intent(context, acessoriy.class); data.putExtra("name","Amrit"); context.startActivity(data); Now in the receiving activity I've used an onCreate() method to retrieve the data that I passed. Bundle extraBundle = getIntent().getExtras(); String name = extraBundle.getString("name"); But the value that I've retrieved here is null. I've read something about the Bundle but I can't seem to make sense of it. Can anyone help me out? A: Try this intent.putExtra("data", "Amrit"); get Intent.getExtras().getString("data"); PutExtra: Put a key/value pair into the intent. You can retrieve the intent by calling getIntent. But, you can also retrieve the intent as a Bundle by calling getExtras, which gives you an Bundle object containing all the intent extras. The key "data" is required in the intent extras. A: You can add a bundle with your data in it and send it as an extra. Intent intent = new Intent(context, acessoriy.class); intent.putExtra("data", "Amrit"); And then in the other class you retrieve this extra. String data = getIntent().getExtras().getString("data"); This is the recommended way to send data. If you use an intent and send something through it, the data that you receive is not guaranteed to be a unique String. In case you need to transfer a lot of data, I would recommend adding it in the DB as a record.
