## **IOGenie File Hider Free Download**

Wisely, never leave any kind of important files on the desktop. If you do, someone could find them easily. Even if they are hard to see in thumbnail form. There are ways to cover up those files or folders and make them disappear, but what if you just do not want people to see those files? Wisely, never leave any kind of important files on the desktop. If you do, someone could find them easily. Even if they are hard to see in thumbnail form. There are ways to cover up those files or folders and make them disappear, but what if you just do not want people to see those files? Have you ever left files or folders on the desktop? Consider this example. There is a folder with the name of "Videos". It contains a bunch of files of various formats. Well, take away the desktop icon for this folder and share it with your friends. They will not be able to view that folder unless they know that your laptop has a desktop. Unfortunately, you will not be the only one who will have access to the folder on the desktop. The person will be able to open the files even if you do not have the password. Simply wondering how to turn on the screen without having to lift your head? Have you always wished you had a way to keep your screen on while you were sleeping? Have you always wished you had a way to keep your screen on while you were sleeping? Hiding files is a security-related task that ensures your file privacy in case your computer is shared with one or more individuals. No matter what type of information you intend to keep away from prying eyes, encrypting, or hiding it always does the trick. IOGenie File Hider is a straightforward tool that lets you not only hide your files and folders but also lock them behind a password. In case you are going to only hiding the items, make sure the other users aren't using software that reveals hidden files. Password-based access Even if you decide to keep the icon on display, the application cannot be accessed without providing a password. Setting the combination up requires no effort. Once the application is done installing, you'll be prompted to create a password. After that, you need to use it to access the tool. Each time you close the app and relaunch it, that password must be typed in. this way, no stranger will have access to your application, unless you share that combination with them. Hide files and folders Hiding files is not the only thing you can do with IOGenie File Hider. You can easily add hefty folders to the list, and even contents from USB flash drives. Once an item is selected. Its status can be checked from within the preview windows. After you choose to hide, lock or encrypt and items, the status will be changed instantly.
