I have a database table that has two columns - a date and a flag (ie True or False). I need to select all rows where the flag is True. But the query only returns True for the 1st row. How do I select all rows where the flag is True? Use JDBC Connection conn = DriverManager.getConnection(url, username, password); Use SQL String sql = "SELECT * FROM tablename WHERE flag = true;" A: You can use a SELECT with an IN statement: SELECT * FROM tablename WHERE flag IN (true, false); Note that a WHERE clause can't use the IN statement. 39 F.Supp. 281 (1941) 648931e174
