This includes FIFA 22's new pitch physics, improved kicking movement, and more, to capture the true experience of football from head to toe. Inevitably, the most technically impressive features are likely to be the most divisive. FIFA 22 introduces "HyperMotion Technology," which uses motion capture data collected from real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay. New User Interactions FIFA has carefully considered all aspects of new gameplay modes and interactions for FIFA 18. This included thinking about the issues in-game and the potential impact on gameplay as well as player enjoyment. New User Interactions and Options FIFA made a specific focus on new interactions and gameplay options for FIFA 18. This included thinking about the issues in-game and the potential impact on gameplay as well as player enjoyment. In FIFA 18, most of the new options will appear on My FIFA, the new hub in the FIFA Ultimate Team mode. At launch, users will have access to the following new options: A new way to control your squad in My FIFA New "Top Players" filters in My FIFA New "Specialist" update filters on Career Mode More of these "new" changes will appear in new feature updates later in the year. Practice with Your Club A new feature called Practice with Your Club allows you to drop in and out of "sandbox mode" with your own custom-made club and take part in "practice games" to see what your tactics and formations can achieve in virtual matches. This gives you the ability to test a new formation, scout a foreign player or even

Features Key:

- Live out your dreams as a manager and a player. Design and run your own football club. FIFA is a football video game series published by Electronic Arts, the first game being released on the BBC Micro in 1987, followed by the release on numerous consoles and personal computers over the following two decades. The FIFA series is primarily a football video game franchise by Electronic Arts and published by Electronic Arts. The series is the best-selling sports franchise in terms of the number of units sold, with FIFA alone selling more than 220 million copies. The FIFA series is a competitive football video game series that simulates many of the rules of association football, most notably the offside rule. In some versions of the game, the title was modified to Football and FIFA to avoid confusion with its American counterpart of the same name. The series has a professional license to use many well-known players, both real and fictional, and features many new ones as well. The aim of the games is for the player to manage a football club and guide it to victory in the game's various championships. In the FIFA series, a football club refers to a team in a major football league, while the game's equivalent of international football is the World Cup. The flagship series has been developed by EA Canada, EA Tiburon and the EA Sports division of Electronic Arts. The FIFA series has been remade numerous times on personal computers, consoles, handhelds, and mobile devices. The first three games were released on Microsoft Windows, and all subsequent games have been released on Microsoft Windows only. However, EA Sports have released an earlier version of the series for the Xbox 360, Xbox One and the PlayStation 3. On mobile devices, the series was launched in 2007 with FIFA 08, the first game to include licensed teams and stadiums from the worldwide Premier League. This was followed by FIFA 11's release on the iPhone and its many versions on mobile devices, as well as the release of FIFA 12 for the PC. The most recent entry, FIFA 18, was released worldwide on September 28, 2017. How is the game played? A football game or football simulation is a video game that tries to simulate the rules of football as closely as possible, but it is not restricted by the rules in the same way as the real game. To play the game, the player is given control of one team with the aim of managing the team to score as many goals as possible in order to progress through the seasons of a football competition, or in the case of international football, to progress through the World Cups.
