Pix-a-ma-jig PC/Windows

Pix-a-ma-jig Torrent Download is a digital photography/picture enhancement program that you can use to quickly resize, enhance, and arrange your digital pictures. This software also allows you to save time by using image processing scripts that automatically resizes, optimizes, and enhances multiple images in a batch file. Pix-a-ma-jig Description: Your photos are your documents of today. But how do you make sure that they really make the best impression on others? Pixamajig is a digital document enhancement tool, that gives you the right tools to simplify, change, and structure the look of your digital documents: Professional levels of quality, usability, transparency and usability: • Adjust your images at the right resolution: When you upload images to your computer, they are often resized (made smaller or bigger) before saving. • Redesign your documents on the digital level: Your document could look much more professional with the right color balance, background, lighting and other special effects. • Enhance your documents so they shine: Unique and new graphical effects can help to transform even the most boring images into something much more professional. • Keep your documents as secure as possible: By using smart document protection options, it is possible to prevent people from editing your documents. Pixamajig Manual on how to operate Pixamajig: Resizing Select an image and select "Resize" to see the result. Or click "Resize" in the toolbar. You can choose between other size options if you click "More Resize" and then select a new size. Adjusting the Image Color Select an image and select "Adjust Color" to see the result. You can adjust color using the sliders and there is a menu bar with options to "Adjust Image Color", "Create New Image Color" or to "Remove Image Color". Adjusting Image Brightness, Select an image and select "Adjust Brightness" to see the result. Select brightness using the sliders and there is a menu bar with options to "Brighten Image" or to "Darken Image". You can also create a "Blank" image in case you need a white image for an image editing project. There is also a "B&W" option which creates a black and white image. You can always create a "White" image by selecting "Create New White Image" in the menu bar. R b7e8fd5c8
