Shipping costs are based on weight and size of the order. Q: Android app supports API level 11-18 In my application I have to test the app with different API and device types. Here is my problem: When I'm testing my app with API 19 and I'm using Google play services, it automatically changes the code base of google play services to the latest api version. I want my app to contain support only 11-18 API levels not 19 and 20. Please tell me, is there anyway to do this? A: Declare google play service, with min sdk in manifest.xml Then in build.gradle dependencies { compile'
